

CLAIMS

- [1] An optical resin sheet, characterized in that it comprises a cured resin layer containing glass fiber, wherein the ratio of the elastic modulus of the glass fiber to the elastic modulus of a cured resin material, which forms the cured resin layer, is 25 or more.
- [2] An optical resin sheet according to claim 1, wherein the glass fiber contained in the cured resin layer is in the form of glass cloth.
- [3] An optical resin sheet according to any one of claims 1 and 2, further comprising a hard-coat layer.
- [4] An optical resin sheet according to any one of claims 1 to 3, further comprising a gas barrier layer.
- [5] A liquid crystal cell substrate containing the optical resin sheet according to any one of claims 1 to 4.
- [6] A liquid crystal display device comprising the liquid crystal cell substrate according to claim 5.
- [7] A substrate for an image display device comprising the optical resin sheet according to any one of claims 1 to 4.
- [8] An image display device comprising the substrate for an image display device according to claim 7.
